

From the mine, to your wallet.

GoldMate is a token project that connects the Daenam Mine mining project with a blockchain ecosystem, building sustainable use cases through Wallet, partner and data services.

WHAT GOLDMATE IS NOT

- ✗ GLM is not a token pegged to the gold price, nor does it represent a fixed weight of gold per GLM.
- ✗ GLM does not represent equity in Daenam Mine, mining rights, or ownership of any specific gold.
- ✗ Principal, interest, returns or price appreciation of GLM are not guaranteed.

01

Project Vision

KEY POINTS

an ecosystem that is easy to understand and genuinely usable

Mine, services and partners connected around GLM and Wallet

Build foundation → Connect services
→ Expand use

Rather than complex structures, GoldMate pursues an ecosystem that is easy to understand and genuinely usable.

Centred on GLM and a dedicated Wallet, it connects mine progress information, membership services, the partner network, data verification and a future gold exchange program into a single flow.

1.1 Phased Direction

01 Build Foundation Prepare the GLM token, GoldMate Wallet and operating policies	02 Connect Services Connect GoldMate Pass, Partner and Verify	03 Expand Use Expand to the partner network and future gold exchange program
---	---	--

FIG 1.1 — GoldMate phased direction

1.2 Operating Principles

01 Fixed Supply 200 million GLM issued in total, with no further minting.	02 Clear Use Cases Linked to membership, payments, partner eligibility and service usage.
03 Service-based Revenue Partner and data service revenue takes priority over token sales.	04 Phased Expansion Features launch as they are ready and expand in line with actual operations.

02

GLM Token

KEY POINTS

BNB Smart Chain · BEP-20

200 million GLM in total, no further minting

No gold-price peg, no fixed gold weight per token

2.1 Token Overview

ITEM	DETAILS
Token Name	GoldMate
Ticker	GLM
Network	BNB Smart Chain
Standard	BEP-20
Total Supply	200,000,000 GLM
Further Minting	None
Gold Price Peg	None
Fixed Gold Weight per Token	None

2.2 Primary Uses

PASS GoldMate Pass Holding or locking GLM can be linked to membership tiers and ecosystem benefits.	PAYMENT Service Payments GLM can be used to pay certain service fees or receive discounts.
PARTNER Partner Eligibility Official partners may maintain their status by depositing a set amount of GLM.	EXCHANGE Gold Exchange Program Once conditions are met, GLM may be used for applications, fee payments or priority participation.

GLM locking is a feature for membership or partner eligibility and does not promise fixed interest, mining income or price appreciation.

03

GoldMate Ecosystem

KEY POINTS

Daenam Mine is the real-world foundation

GLM and Wallet sit at the centre of the ecosystem

Pass · Partner · Verify · Future gold exchange

The GoldMate ecosystem operates around the following seven components.

FIG 3.1 — GoldMate ecosystem components

COMPONENT	ROLE
Daenam Mine	The real-world foundation of the GoldMate project.
GLM Token	The digital unit used within the ecosystem.
GoldMate Wallet	The core service for viewing GLM and project information.
GoldMate Pass	Connects membership tiers, fee discounts and priority participation benefits.
GoldMate Partner	Handles partner onboarding, campaigns, Wallet integration and service expansion.
GoldMate Verify	Registers and verifies reports and related data, expanding into an enterprise API.
Future Gold Exchange	Rolled out in phases once mining and operating conditions are met.

04

Business Model

KEY POINTS

Service and partner revenue, not token sales

Initial revenue from Partner and Verify

Expanding to affiliates, transactions and the Gold Exchange Desk as it grows

GoldMate aims to generate revenue not from token sales but **from service usage and its partner network.**

Initial revenue begins with GoldMate Partner and GoldMate Verify, expanding to affiliates, transactions and the Gold Exchange Desk as the ecosystem grows.

4.1 Revenue Structure

FIG 4.1 — Phased revenue expansion

Four Core Services

MEMBERSHIP

GoldMate Pass

Links holding or locking GLM to membership tiers, fee discounts and priority participation.

B2B

GoldMate Partner

Generates revenue from partner registration fees, monthly fees, campaigns and system integration for businesses and institutions.

DATA

GoldMate Verify

Provides document registration and verification, an enterprise dashboard and a data API.

FUTURE

Gold Exchange Desk

Once the exchange program launches, fees may be charged for exchange processing and refining, custody and logistics.

05

KEY POINTS

Real reasons to use GLM through services and partner eligibility

Operator revenue in KRW, USD or stablecoins

No promise of fixed interest, mining income or price appreciation

GLM Demand Structure

GLM creates real reasons for use by linking to services and partner eligibility. Operator revenue may be received in KRW, USD or stablecoins, while GLM functions as a utility for using the ecosystem.

5.1 How GLM Is Used

HOW GLM IS USED	DETAILS
Membership Lock	Lock a set amount to access membership tiers and benefits.
Fee Payment	Certain service fees may be discounted when paid in GLM.
Partner Lock	Official partners may deposit GLM to maintain their status.
Partner Services	Used for campaign, data and Wallet integration services.
Future Exchange	May be used in future for applications, fee payments and priority participation.
No Fixed Yield	No fixed interest, mining income or price appreciation is promised.

5.2 Operating Principles

- GLM locking is a feature for membership and partner eligibility and is not intended to pay investment returns.
- Partner requirements, usage fees and discount policies will be published before each service launches.
- Token sales are not the sole source of revenue; recurring service revenue takes priority.

06

GoldMate Wallet MVP

KEY POINTS

GLM, membership, partner and project information in one place

Core features first, expanded after security and stability checks

Gold exchange features enabled once policy is finalised

GoldMate Wallet is the core service for viewing GLM, membership status, partner services and project information in one place.

6.1 MVP Core Features

FIG 6.1 — GoldMate Wallet MVP screen layout (illustrative)

- 01 Create and access Wallet
- 02 Receive and send GLM, check balance
- 03 View transaction history
- 04 Check Pass tier and GLM lock status
- 05 Access Partner and Verify services
- 06 View mining progress and future exchange program notices

6.2 Expansion Path

- Initially focused on core features, with more added after security and stability are confirmed.
- Pass, Partner and Verify are connected to the Wallet in the order they become ready.
- Gold exchange features are enabled only after operating conditions and usage policies are finalised.

07

Token Allocation

KEY POINTS

200,000,000 GLM total · No further minting

Marketing & ecosystem growth 30% · Liquidity 20%

Use and release schedules published via official channels

Total supply is 200,000,000 GLM, with no further minting.

FIG 7.1 — GLM token allocation

ALLOCATION	SHARE	AMOUNT
Marketing & Ecosystem Growth	30%	60,000,000 GLM
Liquidity Provision	20%	40,000,000 GLM
Ecosystem & Utility Reserve	15%	30,000,000 GLM
Foundation, Product Development & Operations	12%	24,000,000 GLM
Team & Core Contributors	10%	20,000,000 GLM
Community & Wallet Expansion	8%	16,000,000 GLM
Strategic Partners & Advisors	3%	6,000,000 GLM
Security, Legal & Audit Reserve	2%	4,000,000 GLM
Total	100%	200,000,000 GLM

Actual use and release schedules for each allocation will be published via official channels as the project progresses.

08

Roadmap

KEY POINTS

2026 Q4: project foundation

H1 2027 MVP & beta → H2 full launch

Target start of mining at Daenam Mine:
November 2027

2026 Q4

Project Foundation

Establish GoldMate brand and operating policies

Design GLM and GoldMate Wallet

Business model design and initial partner talks

2027 H1

MVP & Service Beta

Develop GLM smart contract

Launch GoldMate Wallet MVP

Run Pass, Partner and Verify betas

2027 H2

Ecosystem Launch

Full launch of GLM and Wallet

Pilot partner and data services

Target start of mining at Daenam Mine: November 2027

2028 —

Ecosystem Expansion

Expand partner network and API

Enhance Wallet and Verify

Prepare Gold Exchange Desk once operating conditions are met

The roadmap may change depending on development, permitting, mine operations and partnerships.

09

Future Gold Exchange Program

KEY POINTS

Phased rollout once mining and operating conditions are in place

Triggered when cumulative output reaches 10% of estimated reserves

Exchange rate, fees and limits published separately before launch

Once mining progress and operating conditions are sufficiently in place, the program will be rolled out in phases as a **Gold Exchange Desk**. Service fees may apply to exchange processing and to refining, custody and logistics.

9.1 Conditions and Process

TRIGGER

10%

When verified cumulative gold output reaches 10% of estimated reserves and the required operating conditions are met

- 01 Confirm cumulative output threshold
- 02 Review policy, inventory, legal and logistics
- 03 Publish exchange rate, fees and limits
- 04 Phased operation within a set period and scope

9.2 What You Must Know

- No fixed weight of gold is set per GLM.
- Exchange rate, minimum amounts, fees and eligible regions will be published separately before launch.
- Terms may vary with gold inventory, applicable regulations, refining, custody and logistics.
- **Holding GLM alone does not automatically guarantee a gold exchange.**

10

KEY POINTS

GLM is not equity, mining rights, mining income or gold ownership

No guarantee of price, listing, liquidity, principal or returns

Not an investment solicitation or advice

Important Notice

10.1 Nature of the Token

GLM is not pegged to the gold price and does not represent equity in Daenam Mine, mining rights, mining income or ownership of any specific gold.

10.2 Market and Liquidity

GLM's market price, exchange listing, liquidity, principal or returns are not guaranteed.

10.3 Business and Project Changes

Wallet features, the Pass, Partner and Verify services, fee policies, the roadmap and the gold exchange program may be changed or restricted depending on technical, business, regulatory and mine-operating conditions.

10.4 Purpose of This Document

This whitepaper outlines the general direction of the GoldMate project and does not constitute an investment solicitation, a guarantee of returns, or legal, tax or financial advice.

FROM MINE TO WALLET
